

## Client Handling Program Enhancement

This fall, the Ministry of Labour will be conducting a heightened enforcement campaign (a.k.a. blitz) on musculoskeletal disorders. During inspector visits to organizations, MSD prevention programs will be viewed. Attend this workshop to prepare for these visits.

This workshop, focusing on enhancing your current program, will be an interactive session that will engage participants in discussion about their program challenges. This will be an opportunity for organizations to get familiar with using the new tools and resources of the recently revised Handle with Care (3rd edition).

This Half-day workshop will include:

- How to track and analyze client handling injury rates
- How to thoroughly investigate client handling injuries to ensure appropriate controls are effective
- Understand the components of a client mobility assessment is reviewed though
- Tips for promoting program compliance
- Dealing with aggressive clients during the client handling tasks
- Equipment pre-use inspections – safety considerations for clients and staff
- Review of equipment and devices solutions
- Updated client handling logos
